## CNIDOS

### 1. Chemical Analysis of the clay

Even more clearly than for Chios, the attribution to Cnidos of the sample APO 275 from Apollonia appears validated by its insertion within a cluster gathering amphora samples collected on the Cnidian peninsula itself from workshop sites in the Reşadiye sector (see. M. Picon & J.-Y. Empereur, *BCH Suppl.* XIII, 1986).

Ribarska str., 19. Apollonia pontica. End of the 3<sup>rd</sup> – 2<sup>nd</sup> c. BC
